

1000 wh power station factory in Mozambique

What is Mozambique's largest gas-fired power station?

Expected to be the largest gas-fired power station in Mozambique, the plant will generate 450 megawatts (MW) of electrical energy using natural gas reserves from Pande and Temane over a period of 25 years. This capacity increase is projected to raise the country's installed electricity production capacity by approximately 16%.

What is the largest power plant in South Africa?

The largest power generation plant in the country is the Cahora Bassa hydro dam, operated by the government owned Hidroelctrica de Cahora Bassa (HCB). HCB sells 65% of its existing generation to South Africa, and the remaining 35% is sold to the northern regions of Mozambique and to Zimbabwe.

Where will Mozal power plant be located?

The plant is expected to supply power to the Mozal aluminum smelter located in Beluluane. Other customers for the Beluluane power station are expected to be South Africa and other markets in the SADC (Southern African Development Community) region.

Will Mozambique become a regional hub for electricity production?

In July 2019, The Mozambican government approved the terms and conditions for a 2000 MW gas-fired power station. The plant is part efforts to turn Mozambique into a regional hub for the production and supply of electricity, implementing the integrated electricity master plan, which envisions the production of 8,000 megawatts by 2043.

OverviewLeading Sub-SectorsOpportunitiesTransmissionGenerationDistributionMozambique has the largest power generation potential of all Southern African countries. Power Africa estimates that it could generate 187 gigawatts of power from coal, hydro, gas, wind, and solar. Most of the power currently generated is from hydroelectric projects, however, natural gas, and renewable energy sources will have a significant impact i...See more on trade.gov.b_imgcap_altitle p strong,.b_imgcap_altitle .b_factrow strong{color:#767676}#b_results
