

100kw solar inverter for sale in New-Zealand

What types of solar inverters are available in NZ?

There are different types of inverter available. This includes inverters that can connect to the electricity grid based on your home's connection. One of the most common types of solar inverter in use in NZ, however, is the hybrid inverter.

What is a solar inverter?

A solar inverter is a critical component of a solar energy system, responsible for converting the direct current (DC) power generated by solar panels into alternating current (AC) power that can be used to power homes and businesses. The process of converting DC to AC involves several stages, including the following:
