

What is a 25kW hybrid solar system?

A 25kW hybrid solar system combines the features of on-grid (with net-metering) and off-grid (with battery) solar systems. This solar system was named the hybrid solar system because of its crossover properties. It includes net-metering as well as solar batteries, and can be operated with or without a government grid.

How do iStore hybrid inverters work?

The iStore hybrid inverters feature MPPT Multi-Peak Scanning, optimising energy production even in shaded conditions by tracking multiple power peaks and adjusting to the optimal point. This ensures higher energy yields even when parts of the solar array are partially shaded.

What are the different types of solar inverters?

Available in 10kW, 15kW, and 25kW models. Durable, high-performing inverters minimise maintenance calls. Ideal for residential, commercial, or industrial solar setups. Advanced safety and reliability features provide peace of mind to your customers.

How much power does an iStore inverter deliver?

iStore inverters can deliver up to 37.5 kW of combined AC and DC output, offering efficient power to the grid, real-time energy consumption, and integration with storage systems for extra flexibility. Covers materials and workmanship for 10 years, ensuring long-term reliability and performance.
