

# Argentine photovoltaic container DC for urban lighting

Is solar photovoltaic the future of electricity generation in Argentina?

However, despite significant natural potential, solar photovoltaic still represents only a small share of Argentina's total electricity generation. Although this picture may look bleak, a wide range of market segments relating to decentralised photovoltaic generation in Argentina have developed.

Can decentralised photovoltaic systems diffuse in Argentina?

In order to contribute to this discourse, this study employs the TIS framework to investigate the current prospects for the diffusion of decentralised photovoltaic systems in Argentina and, in doing so, develops a deeper understanding on a theoretical and empirical level of the context interaction dynamics.

Can PV energy be fed into the grid in Argentina?

In comparison to the global situation, the possibility to feed excess energy generated from PV systems into the grid in Argentina was only approved at national level relatively recently. Consequently, participants in this study rated interactions with distribution network operators as important.

Where is the largest photovoltaic plant in South America?

All thanks to the inauguration of the largest photovoltaic plant in South America. Located in the Puna of Jujuy, the Cauchari plant has been equipped with more than 900 thousand solar panels that will occupy 600 hectares in the town of Susques, about 4200 meters above sea level.
