

# Australia 5g base station communication project bidding

How do I find mobile phone base station sites in Australia?

You can use the Radio Frequency National Site Archive (RFNSA) website to search for active and proposed mobile phone base station sites in Australia. Each site has a dedicated information page that includes the site's location, an Environmental EME Report, the carrier's contact details, and other relevant community consultation information.

What percentage of Australia's population is covered by 5G?

While Telstra earlier this year announced that its 5G mobile network covered 87 per cent of Australia's population, for example, the MAV data show that coverage on the roads between those areas, and the areas outside of the major population centres, remains sporadic or absent.

Why do companies bid for telecommunications tenders in Australia?

Bidding for Telecommunications tenders in Australia is extremely lucrative for companies of all sizes. Australia tendering authorities release contracts for most of the Telecommunications products and services procured by them. The most popular categories are -

How will a mobile base station audit help network operators?

The detailed data from the audit will help network operators better plan their future base station rollouts and target funding under programs like the federal government's Mobile Black Spot Program, which has so far delivered nearly 1,400 mobile base stations through seven rounds of funding.
