

What is a 8800sx radio?

The 8800SX is designed for complete automated radio test and alignment for analog and digital radios. Using the accurate instrumentation and high-speed remote command architecture, the 8800SX optimizes radio performance in minutes; with minimal human interaction.

What does the 8800sx do?

The 8800SX provides analysis of the HDQPSK downlink and HCPM uplink modulation formats used in the Phase 2 standard. The 8800SX includes a cost effective way to measure the critical parameters for field-testing of TETRA base stations.

Does the 8800sx provide digital voice quality testing?

The 8800SX provides digital voice quality testing with its unique Record and Playback feature for P25, DMR, dPMR, NXDN, and ARIB T98 radio systems. Users can record live voice from a radio under test, regardless of vocoder type, and play back the recording to the radio for audio quality verification.
