

What is Energy Storage Summit Germany 2026?

With billions in infrastructure investment, strong merchant-led dynamics, and a government targeting 80% renewables by 2030, the country is driving forward grid-scale storage. Energy Storage Summit Germany 2026 connects you with the policymakers, traders, financiers, and developers shaping this growth. Meet the right people, in the right setting.

Do you need to store solar power?

When power is drawn from the electrical grid at a flat rate, there is no need to store that solar power. Storing excessive thermal energy to be used in colder times is one of the oldest forms of energy storage known to us. Recent research and development have made it possible to use this energy for grid applications.

Why is energy storage a problem in the EU?

Energy storage suffers from lack of regulatory certainty within the EU. While a number of member states - Germany and the UK especially - have made great strides in adoption levels, lack of consistency is a looming issue.
