

Cambodia Photovoltaic Energy Storage Container 120kW

How many solar farms are being built in Cambodia?

That tracker also reveals 620 MW of capacity is on the way from two solar farms currently under construction, with an additional four installations planned. Cambodia is also set to enhance its renewable energy infrastructure with two new storage projects, according to Minister of Mines and Energy Keo Rottanak.

Can Cambodia push for a greener energy future?

"Cambodia has an opportunity to push for a greener energy future by requesting investment specifically in clean technologies like solar, battery storage, and closed-loop systems of pumped storage hydropower," she said. So far, large-scale solar farm development has moved slowly in light of the country's immense amount of untapped shine.

Will solar power boost Cambodia's energy share?

Phnom Penh, Cambodia -- Cambodia is on track to significantly boost its solar energy share, with new figures projecting solar to make up 7% of the country's electricity supply by 2025. This equates to a total installed capacity of 530.14 megawatts (MW) -- a major leap from 3.2% in 2023 and 4.6% in 2024.

Does Cambodia have a solar generation regulation?

In 2018, Cambodia introduced a solar generation regulation, a new driver for the country's solar PV system development. Cambodia's grid-scale solar development started with just a 10 MW pilot in 2017.

Cambodia's solar energy capacity is set to hit 530.14 MW in 2025, making up 7% of national power supply -- up from 3.2% in 2023. Discover key projects.
