

Construction of solar energy storage station in factory

When was Tesla's Energy Storage megafactory built?

Construction of Tesla's energy storage Megafactory started in May 2024. It became operational in February 2025, and started exporting products to Australia the following month. The energy storage Megafactory is the first of its kind built by Tesla outside the US and the company's second plant in Shanghai.

Will Tesla's first grid-side energy storage station be built in China?

It will be Tesla's first grid-side energy storage station to be built on the Chinese mainland. Dong Kun, general manager of Tesla China's energy business, said the station, once launched, will participate in electricity spot trading, helping balance peak and off-peak power demand in the local grids and enhance grid stability.

How will Tesla's Energy Storage megafactory benefit Shanghai?

"It will enhance grid flexibility and help integrate renewable energy in the Lingang New Area, supporting Shanghai's seasonal power demands and regional energy security," Dong said. Construction of Tesla's energy storage Megafactory started in May 2024.

What is Tesla's first energy storage facility outside the US?

First Energy Storage Facility Outside the U.S. The Shanghai Megafactory will mark a pivotal step for Tesla as its first energy storage production site outside of the United States. This venture highlights the company's strategy to extend its influence and capabilities beyond traditional automotive manufacturing.
