

Haiti Energy Storage New Energy Battery Manufacturer

What is Haidi energy technology?

Haidi Energy Technology is a true leader in battery technology. Our Li-ion battery technology combines Li-ion chemistry, low impedance. The battery design and world-class manufacturing system provide customers with an unprecedented cost/performance advantage over any other technology.

What makes Haidi a good battery?

Haidi's unique design tends to make our prismatic cells thin and light, and also with the feature of space saving. The rectangular shape of thin prismatic cells offers better layering than cylindrical cells, giving more flexibility for battery design engineers. Haidi Energy Technology is a true leader in battery technology.

Are Haidi lithium iron phosphate cells incombustible?

Haidi Lithium Iron Phosphate cells are incombustible in the event of mishandling during charge or discharge, they are more stable under overcharge or short circuit conditions and they can withstand high temperatures without decomposing. When abuse does occur, the phosphate-based cathode material will not burn and is not prone to thermal runaway.

What services does Haidi offer?

We offer a comprehensive range of manufacturing services. Haidi leads the industry in the research, design, manufacturing, and distribution of leading-edge lithium battery technologies and we are developing new technologies and delivering enhanced solutions for applications where performance and productivity matter.
