

Who makes power inverters?

EPC Power is the only manufacturer in North America producing grid-scale power inverters. A power inverter is a device that converts electricity between AC (Alternating Current) and DC (Direct Current). AC electricity is the type that powers our homes through power lines, while DC electricity is commonly supplied by batteries.

What is the difference between AC and DC power inverters?

AC electricity is the type that powers our homes through power lines, while DC electricity is commonly supplied by batteries. EPC Power inverters are utilized in various applications, with the primary uses in solar and large-scale battery storage facilities.
