

How many 5G base stations has Kyiv Communications built

How many base stations does Kyivstar have?

Kyivstar has built the largest communication infrastructure in Ukraine, with over 70.7 thousand base stations. The company operates its own fiber-optic network with a total length of more than 44,000 km and a capacity of 16 Tbps

How many base stations are there in Ukraine?

"We've had more than 10 percent of our sites completely or partially destroyed," explains Sasha Ananyev, head of the network operation department at Vodafone Ukraine. That's roughly 1,400 base stations, and does not include base stations located in Donetsk and Luhansk, areas that have been occupied by Russia since 2014.

How many 5G base stations will India have by 2025?

The country has set an ambitious goal of deploying over 500,000 5G base stations by 2025, a target driven by telecom giants like Reliance Jio and Bharti Airtel. The Indian government has actively supported 5G expansion, conducting large-scale spectrum auctions and offering incentives for infrastructure development.

Is Russia stalling Ukraine's 5G plans?

While many operators across Europe have focused on launching 5G networks, the same can't be said for Ukraine. Speaking to DCD, Stanislav Prybytko, director general of the directorate for mobile broadband for Ukraine's Ministry of Digital Transformation, explains that the war with Russia has stalled the country's 5G goals.
