

# How much does an outdoor portable power supply cost

How much power does a portable power station need?

For portable power stations, capacity is measured in watt-hours (Wh), telling you how much energy the unit stores. Weekend adventures typically need 200-300Wh for smartphone charging and LED lighting. Glamping and campground camping with amenities require 500-700Wh units to power fans, portable coolers, and CPAP machines.

Why should you buy a portable power station?

The small premium for quality pays dividends through consistent performance and durability. With the right portable power station for your specific camping needs, you'll enjoy enhanced comfort, better device reliability, and the freedom to explore further without sacrificing modern conveniences. Happy camping!

Do portable power stations make camping better?

A good portable power station makes camping better. These devices power lights, phones, and small appliances when you're outdoors. We spent three months testing power stations to find the best portable power stations for camping. We tested 30 portable power stations over 12 camping trips.
