

How to use the external battery cabinet of the communication network cabinet site

What is an external battery cabinet (EBC)?

The External Battery Cabinet (EBC) is available in two models to meet the needs of the Eaton 93E UPS product line. The following sections detail the battery specifications, battery runtimes, and the environmental and safety specifications for the UPS. Service conferrable 0.5-34A per string, with overall maximum of 34A (limited by input current).

Can I use an external battery cabinet with an ups?

Each battery cabinet has its own overcurrent protection device. External battery cabinets can be used in combination with a UPS containing internal batteries. Internal battery strings are to be connected by an authorized Eaton Customer Service Engineer. 1.7 For More Information for UPS cabinet conduit and terminal specifications and locations.

How is a ups connected to a battery cabinet?

In standalone configurations power wiring is routed using external conduit. Connections are made to easily accessible terminals at the back of the cabinet. Line-up-and-match battery cabinets are installed adjacent to the UPS.

Where do I install a line-up and match Battery Cabinet?

Line-up-and-match battery cabinets are installed adjacent to the UPS. The recommended installation location is on the right side of the UPS cabinet. See Figure 2 and Figure 3 for line-up-and-match configuration views. Contains two or three battery strings to be used with the 93E 30 kVA UPS.
