

What is metal clad switchgear?

This design is commonly used in space-constrained environments such as high-rise buildings, commercial centers, or densely packed control rooms. Metal-clad switchgear is often labeled using standardized model codes, such as KYN. Here's what each letter stands for: Let's explore some of the common KYN series in more detail:

What are the advantages of metal clad switchgear?

Metal-clad switchgear offers several distinct advantages that make it the go-to choice for many installations: : Metal enclosures and compartmentalized design reduce the risk of arc flash and electrical faults spreading. : Components like circuit breakers can be withdrawn without dismantling the entire system.

Who are Aussie switchboards?

Welcome to Australia's Premier Switchboard Manufacturer. At Aussie Switchboards, we specialise in the design and manufacture of low voltage power distribution boards, main switchboards, meter panels and motor control centres. Whether you need a large 3200 Amp electrical switchboard or a small metal enclosure, we can help.

What is a compartmentalized switchgear?

This compartmentalized design helps reduce the risk of faults spreading within the system and enhances operational safety. In the field of switchgear, two major design types are commonly referenced: removable (fixed-mounted) and withdrawable (draw-out) switchgear.
