

Nicosia s new outdoor communication power supply BESS

How does a Bess work?

A Battery Energy Storage System (BESS), such as those offered by FusionSolar, works by storing energy in a rechargeable battery and releasing it back into the power grid during peak demand or when renewable energy sources are low. This process involves an inverter and sophisticated control software.

Does Bess require uninterrupted power?

Some BESS suppliers mandate uninterrupted power to maintain the operation of thermal management systems, ensuring battery temperatures remain within desired limits to minimize degradation. BESS fire safety standards, such as NFPA 855, outline minimum requirements for backup power for fire safety systems.
