

What is the largest battery energy storage project in the Nordics?

SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will build the largest battery energy storage project in the Nordics. The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower.

What do Nordic batteries do?

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

How much storage capacity does SEB Nordic energy have?

The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower. Located in Nivala Municipality in Finland's Ostrobothnia region, the project is expected to be completed in 2026.

Is there a future battery storage park in Finland?

Computer-generated picture of the future battery storage park in Finland. SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will build the largest battery energy storage project in the Nordics.

Richard Gavel, Portfolio Manager at SEB Nordic Energy, noted that the new battery storage project diversifies the fund's assets and accelerates the transition to sustainable ...

Battery energy storage systems (BESS) continue to play a vital role in the Nordic energy transition. Based on Marsh's experience in advising BESS owners in the Nordics, cold ...

Furthermore, energy storage assets are critical for maintaining grid stability and contributing to a more decentralized energy system. The Nordic Market: Poised for a Battery ...

SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will build the largest battery energy storage project in the Nordics. The project will ...

Hitachi Energy will supply Finland's largest 125MW battery storage system for Alpiq in Haapajärvi, scheduled for mid-2027, to bolster grid stability and support the nation's energy ...

Just last month, Stockholm unveiled Northern Europe's largest lithium-ion storage array - 150 connected containers storing enough energy to power 45,000 homes during winter blackouts. ...

A new battery storage project is nearing completion in Borup, Denmark, a region just north of the country's capital city, Copenhagen. ...

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid ...

Finland's authorization of its largest battery-storage project marks a pivotal point in the renewable energy landscape. As energy ...

Battery energy storage is essential for the Nordic region's energy transition, enhancing grid stability and reliability. Batteries can provide crucial backup power, regulate ...

Finland's authorization of its largest battery-storage project marks a pivotal point in the renewable energy landscape. As energy stakeholders anticipate the completion of the ...

A new battery storage project is nearing completion in Borup, Denmark, a region just north of the country's capital city, Copenhagen. According to Renewable Energy ...
