

What is Nordic Light?

Designed to maximize natural light during Minnesota's long, dark winters, Nordic Light features reflective white oak floors and ceilings that bounce light in a vertical plane. The wood is a nod to the local prominence of oak and aspen savannas, whose presence on the property was also used to delineate the site plan.

Where are Nordic lights manufactured?

NORDIC LIGHTS' headquarters and main assembly plant is located in the close-knit, entrepreneurial region of Jakobstad, Finland. Since 1992, nearly all of our vehicle lights have been assembled, tested and shipped from here. NORDIC LIGHTS' LED work lights for vehicles are durable, low-maintenance, shock- and vibration-resistant.

What are Nordic lights' special lights?

The NORDIC LIGHTS' special lights are custom designed to be mounted in engine rooms and on equipment booms, bucket-wheel excavators, harbour masts and more. In this group of heavy-duty special lights, you will find unique special work lights like the gigantic Gemini and the precise Pictor.
