

# Outdoor energy storage boom

What drives China's EV storage boom?

While government mandates are a key driver of China's storage boom, big power users such as industrial parks and EV charging stations are also driving adoption. China, where 60% of the world's electric vehicles are sold, has worried about the effects of EVs on its power grid, and storage can help smooth demand spikes.

What is China's new energy storage project?

Built by Lijin County Jinhui New Energy Co, the project is part of an explosion in development of energy storage in China, which has called for even more investment in the sector to boost renewable electricity and ease grid bottlenecks.

Where is the energy storage station in China?

An aerial drone photo taken on Aug. 21, 2024 shows a view of an energy storage station at Taiyangshan Township of Wuzhong, northwest China's Ningxia Hui Autonomous Region. (Xinhua/Yang Zhisen) NANJING, Jan. 24 (Xinhua) -- In an eastern Chinese coastal county of Rudong, a 35-story-high steel structure houses around 1,000 25-tonne gravity blocks.

Does China's energy storage capacity exceed pumped storage capacity?

China's installed capacity of new-type energy storage exceeded that of pumped storage for the first time at the end of 2024, according to the recent data release of China Energy Storage Alliance (CNESA).
