

Which NGCP projects were approved in Luzon in November 2024?

In November 2024, the ERC approved two major NGCP projects in Luzon - the PHP17.09 billion, 500 kV Bolo-Balaoan line and the PHP16.8 billion, 230 kV Northern Luzon loop. It also approved the PHP4.2-billion Nabas-Caticlan- Boracay project in Visayas and the PHP2.34 billion, 230 kV Laguindingan substation project in Northern Mindanao.

How does the NGCP energise the power grid in Mindanao?

In Mindanao, power is generated from renewable and conventional plants in Lanao, Misamis Oriental and Davao. A 230 kV backbone enables power transfer between northern and southern Mindanao. In 2024, the NGCP strengthened the grid with the full energisation of three EPNS projects- MVIP, CNP3 and the Hermosa-San Jose (HSJ) transmission line.

When will the Bacolod substation project be completed?

Expected to be completed by August 31, 2028, this project will be constructed to ease transformer congestion at the Bacolod Substation, ensuring a more stable power supply for the growing electricity needs of Bacolod and surrounding areas.

What are the Granada & Sumangga substation projects?

The projects, which include the Granada, Sumangga, and La Carlota substations, as well as the Nagsaag-Tumana transmission line, aim to prevent power overloading, enhance supply reliability, and meet growing electricity demand in key areas.
