

How much does a solar roof tile system cost?

To give you an idea, the average 3.5 kW solar roof tile system will cost around $\$13,000$, compared to approximately $\$7,000$ for a regular PV system. However, remember that you are also getting a new roof with your solar tiles, so a direct price comparison is slightly misleading. Information last updated in April 2025.

What is the cost of a solar module?

The cost of a solar module has decreased significantly since 2006. The average value of solar PV module shipments, a proxy for price, decreased from $\$3.50$ per peak watt in 2006 to $\$0.40$ per peak watt in 2019.

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.
