

How much does it cost to install solar on a roof?

**Roof Age and Condition:** Your roof should be in good condition with at least 10-15 years of remaining life. Installing solar on an aging roof that needs replacement within 5-10 years can result in costly panel removal and reinstallation fees, typically \$3,000-\$5,000.

What is rooftop solar power?

Rooftop solar power, also known as rooftop photovoltaic (PV) systems, refers to solar panels installed on residential or commercial building rooftops to generate electricity. These systems convert sunlight directly into electrical energy through photovoltaic cells, providing clean, renewable power for your home or business.

What is a good price per watt for rooftop solar?

A good price per watt for rooftop solar provides a balance of savings potential and robust warranty and service coverage. Based on recent solar pricing trends from the SEIA, this balance can be found in the \$3-4 per watt range for residential solar projects.

Is rooftop solar a good investment?

Rooftop solar power represents one of the most impactful decisions homeowners can make for their finances, energy independence, and environmental impact. With 2025 bringing continued cost reductions, technological improvements, and strong federal incentives, the value proposition for rooftop solar has never been stronger.

Price per watt is a useful measurement to compare solar pricing apples-to-apples. We explore what a good price per watt is in 2024.
