

# Romania's new wind power storage project

What is Romania's largest battery project?

Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date. The company will build a 400 MWh facility in Floresti, Cluj county, which is expected to be operational by the end of 2025.

Will wind farms increase power supply in Romania?

Wind farms could contribute with 13 GW to the national power generation capacity by 2020. Between 2009 and 2017, total wind farm capacity will comprise 4,000 MW with investments of US\$5.6 billion. Additionally, potential offshore wind farms may increase supply.

When did Romania start using wind power?

Wind power in Romania started in 2009 with an installed capacity of 14 MW. As of the end of 2016, the total cumulative installed capacity had increased to 3,028 MW.

How is Romania transforming the European energy landscape?

The investment wave, supported by key regulatory changes, is elevating Romania in the European energy landscape. Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date.

The largest battery energy storage system (BESS) to date in Romania, with a capacity of 200 MW/400 MWh, has been commissioned in Cluj County by the private investor ...

Nova Power & Gas's 400 MWh project in Cluj County is the largest battery energy storage system (BESS) to date to have been connected to Romania's grid.

This single project will double Romania's current installed storage capacity of 398.8 MWh, a figure that comes from transmission ...

Nova Power & Gas, part of the E-INFRA group, has announced the commissioning of the largest battery energy storage facility in Romania, with a power of 200 MW and a storage capacity of ...

Nova Power & Gas, part of the E-INFRA Group, has announced the commissioning and start of commercial operations of the largest battery energy storage system (BESS) in ...

Before the new facility was commissioned, Romania's overall battery energy storage capacity was 398.8 MWh, according to data from ...

# Romania s new wind power storage project

Battery storage and new generation capacities are precisely the types of projects Romania needs to modernize its energy system and safely integrate an increasing share of ...

Romania commissions 400 MWh battery storage project WORLD BESS 17.12.2025 14:10 (UTC+04:00) The largest battery energy storage system (BESS) to date in ...

Before the new facility was commissioned, Romania's overall battery energy storage capacity was 398.8 MWh, according to data from the country's transmission system operator, ...

Romania has commissioned its largest battery energy storage system (BESS) to date: a 200 MW / 400 MWh project in Cluj County, developed by private investor Nova Power & ...

Nova Power & Gas, a subsidiary of the E-INFRA Group, has officially commissioned Romania's largest battery energy storage system (BESS), a 200 MW facility with 400 MWh of ...

This single project will double Romania's current installed storage capacity of 398.8 MWh, a figure that comes from transmission system operator Transelectrica, and mentioned ...
