

Why do solar panels get dirty?

However, dust, dirt, bird droppings, leaves, and even pollen can settle on the panels over time, forming a barrier that reduces their ability to absorb sunlight. Studies show that dirty solar panels can lose anywhere from 15% to 30% of their efficiency. In areas with high dust levels, this number can go even higher.

Do dirty solar panels lose efficiency?

Studies show that dirty solar panels can lose anywhere from 15% to 30% of their efficiency. In areas with high dust levels, this number can go even higher. Maintaining clean and well-functioning panels helps:

Can I wash my roof with solar panels?

Just like washing your car, you can also DIY solar panel upkeep. However, using soap and water on your roof is much more risky than in your driveway. If you lack experience working on roofs, we recommend hiring a professional solar panel cleaner.

Can you clean solar panels yourself?

You can clean your solar panels yourself, but you must do it safely and correctly. Here's how: Shut down the system: Turn off your inverter and follow the manufacturer's shutdown procedure. Gently rinse panels with water: Avoid using high-pressure washers, which can damage the surface or loosen wiring.
