

How much does a curtain wall cost?

According to Hardev, the installed cost of passive curtain wall (industry jargon for an ordinary glass exterior) is on average \$100 per square-foot, despite varying considerably. He suggests that an active (solar cell) curtain wall would cost closer to 30 percent more, or \$130 per square-foot, including wiring.

Why do curtain wall systems cost so much?

The size and dimensions of the curtain wall system play a crucial role in determining the price. Larger systems require more materials, increased fabrication time, and specialized transportation. Additionally, oversized glass panels may need additional support and engineering considerations, resulting in higher costs.

What is a solar curtain wall?

The company's ' solar curtain wall ' covered the entire side of a building with plastic solar film encased in glass. This installation was expected to provide 1.5 kW of power. Unfortunately, the company filed for bankruptcy in 2012 but they did help to further the solar power curtain concept. Another option comes from a company called SolarGaps.

Are energy-efficient curtain walls a good investment?

Higher-performing systems that meet stringent standards and certifications, such as LEED or BREEAM, may come at a higher price. However, investing in sustainable and energy-efficient curtain walls can yield long-term benefits by reducing operational costs and enhancing a building's overall value.
