

Can solar panels be installed on a tile roof?

Yes, solar panels can be installed on a tile roof. In fact, companies have developed methods to install solar panels on tile roofs. Before installation, there's a pre-installation or preparatory stage to consider.

Can a solid Solar Installer install concrete tiles?

For concrete tile roofs, a solar installer can install solar panels. They will temporarily remove just a few tiles, install base plates onto the roof membrane, and attach special hooks to them.

How do I install a roof-integrated solar panel?

Roof-integrated solar panel installation is a simple process with Marley SolarTile® - just secure the fixings, place the first tile, push-fit additional tiles and then attach final fixings and flashings.

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.
