

How much do solar panels cost in New York?

The biggest hurdle to solar and battery is the sticker price, especially in New York where homeowners need more panels to get the same production as sunnier states. Even after applying state and federal incentives, a typical solar-only project costs between \$10,000 to \$20,000, and not everybody has that kind of cash lying around.

Where can I get solar panels in New York?

You can get almost any panel you like from Momentum Solar, including panels from companies like QCells, REC, and Silfab, to name just a few. Having the freedom to customize your system is a big plus in New York since the cost of solar equipment is so high in the state.

Do solar panels work in New York?

Solar panels still work great in cold temperatures and can withstand the harsh winters New Yorkers get upstate. With 4 to 4.5 peak sun hours each day, New York gets plenty of sun for your solar system to produce energy, but depending on where you are, you may need a few more panels than other places to meet all of your energy needs.

Is investing in solar panels worth it in New York?

According to feedback from over 500 solar energy customers in New York, solar panel investments pay off over time in the state. New York's decent amount of sunlight and relatively solar-friendly policies make it one of the best states for solar panels.
