

Is battery energy storage a pillar of Romania's energy transition?

Recent updates about investments in battery energy storage systems (BESS) in Romania indicate the technology is becoming another pillar of the country's energy transition alongside wind power. For several years now, photovoltaics, and prosumers in particular - including municipal authorities, have dominated the scene.

How long will a battery energy storage system last in Romania?

It is about to start building the BESS in Scornicesti in Olt county, west of Bucharest. R.Power is planning to complete it in a year. The battery energy storage system would have a duration of two hours, translating to 254 MWh in capacity. The project received funding from the National Recovery and Resilience Plan (NRRP or, in Romanian, PNRR).

How does Romania support the production of solar / PV energy?

The Romanian State supports the production of solar /PV energy by offering six (6) green certificates for each MWh produced and injected into the grid.

Which companies are combining Bess with solar power in Romania?

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities. The group includes R.Power, Hidroelectrica, Engie and more big names.

Trina Storage, the energy storage division of Trina Solar, has teamed up with Allview, one of Romania's leading EPC contractors, to develop a Battery Energy Storage ...

In a rising investment wave, firms in Romania are combining energy storage with solar, wind and hydropower or building standalone ...

Romanian technology group Visual Fan, best known for its consumer electronics brand Allview, announced that it has signed a partnership with Trina Storage, the energy ...

Trina Storage, the energy storage subsidiary of Trina Solar, has signed its first battery energy storage system (BESS) project in Romania alongside engineering, ...

A Chinese company broke ground on a 31.82-megawatt photovoltaic power station in Calarasi County, southeast Romania, on Friday. During the ceremony, Chinese ...

In a rising investment wave, firms in Romania are combining energy storage with solar, wind and hydropower or building standalone systems.

Trina Storage, the energy storage division of Chinese company Trina Solar, has signed a strategic partnership with Visual Fan, the owner of the Allview brand and one of the ...

According to Wechat Official Account @EnergyStorage001,, China Energy Engineering Corporation (CEC) and Romanian Venerable EPC Company formally signed a ...

Based on its renewable energy potential and considering the national energy sector's current characteristics - generation assets, interconnections, market design, ...

Trina Storage is set to supply a 65MWh battery energy storage system (BESS) for a new project in Romania, marking its first deployment in the country. The initiative, located in ...

Romanian technology group Visual Fan (BVB: ALW), the company behind the Allview brand, announced a partnership with Trina Storage, the energy storage arm of ...
