

Subsidies for new energy storage power stations in Ethiopia

Who owns the energy grid in Ethiopia?

It is the biggest player in the Ethiopian energy sector. EEP owns and operates the national power grid, including all high-voltage lines (over 66 kV), all the associated substations and nearly all the power stations on the grid (some power plants belong to the state-owned Ethiopian Sugar Corporation).

Does Ethiopia have a reliable electricity supply?

Despite its leadership in renewable energy, nearly 50% of Ethiopia's population still lacks access to reliable electricity.

How much does electricity cost in Ethiopia?

The corresponding price for units of electricity over the 500 kWh threshold for a single month is ETB 1,1410/kWh (USD 0,04/kWh). In 2013/14, the former Ethiopian Electric Power Corporation was split into two separate units: Ethiopian Electric Power (EEP) and Ethiopian Electric Utility (EEU).

What is Ethiopia's energy strategy?

Ethiopia's energy strategy is strongly anchored in hydropower, but long-term resilience depends on accelerating the development of solar and wind energy. To avoid overreliance on a single source, the government must fast-track grid integration and enhance private sector participation through Independent Power Producer (IPP) schemes.

renewable energy and green industry development. Technical discussions emphasized the importance of strengthening the grid, preparing for renewable energy auctions, ...

Ethiopia stands at a critical juncture in its energy journey. The country has ambitious plans to harness its vast renewable energy potential, reform its power sector, and achieve universal ...

Ethiopia stands at a critical juncture in its energy journey. The country has ambitious plans to harness its vast renewable energy potential, reform its ...

Addis Ababa, August 15/2024 (ENA) Ethiopia has been offering extensive fiscal and non-fiscal incentives for investments in renewable energy as it has identified the energy sector among ...

Partnership Ready: Renewable Energies Legal and institutional context of the Ethiopian electricity sector The legal framework governing the Ethiopian energy sector was ...

Why Energy Storage Subsidies Matter for East Africa You know, when Ethiopia's capital announced its new energy storage subsidy program last month, it wasn't just local ...

Subsidies for new energy storage power stations in Ethiopia

The increases in the share of decentralized sources and electricity prices due to the subsidy reforms could be considered as a positive sign to the private investors and complement ...

Ethiopian Electric Power (EEP) is focusing on the management of 14 hydropower and three wind power plants, substations and transmission lines in the country, while new power-generation ...

Acknowledgements The National Roadmap for Scaling Up Productive Use of Renewable Energy (PURE) in Ethiopia was developed by the Ethiopian Solar Development ...

Addis Ababa, August 15/2024 (ENA) Ethiopia has been offering extensive fiscal and non-fiscal incentives for investments in renewable energy as it ...

WASHINGTON, July 29, 2025 -- The World Bank Board of Executive Directors has approved the Accelerating Sustainable and Clean Energy Access Transformation (ASCENT) ...

The project comprises solar power, energy storage, fire prevention and control, remote control telecommunication, and emergency power generation systems. SUMEC is ...
