

Are batteries better than solar panels?

Batteries are bulkier than solar panels and need a suitable storage location. If you have limited space available, accommodating more batteries might become challenging. Alternatively, adding more solar panels to your system also offers several advantages. The primary benefit is increased energy production.

Why do you need more solar batteries?

With more batteries, you can store more solar energy, allowing you to power your home or business even during periods of low solar generation or at night. This can enhance energy independence and reduce reliance on the traditional electrical grid. Secondly, additional batteries provide a backup power source in case of power outages.

Should I add more solar panels or batteries to my home energy system?

To understand whether it's better to add more solar panels or batteries to your home energy system, it's a good idea to know exactly how these devices work individually and together. Solar panels convert sunlight into electricity, which can be used to power your home directly.

Why should you install more solar panels?

All things being equal, installing more solar panels generally provides more benefits in terms of energy generation, long-term cost savings and overall efficiency. Solar panels have a longer lifespan than batteries and directly contribute to generating clean, renewable energy for your home.
